

Testimonial - Scott Mitting

October 6, 2021

I have worked with Scott Mitting on many diverse and innovative projects over the past 20 years. The breadth of his experience, coupled with his natural insight, make him an excellent choice for a director or C-level executive overseeing the architecture, implementation and maintenance of technology projects.

In addition to his leadership skillset, he is also the most talented developer I've known. His passion for development motivates him to constantly explore and develop cutting edge platforms and tools. He is able to quickly architect elegant software solutions and swiftly execute, producing clean, well-documented and highly efficient code. He is an expert at developing new projects as well as analyzing and reverse-engineering existing systems.

Scott has a great deal of experience with many diverse project types, technology platforms, programming languages, networking technologies and cross-platform integrations. He is able to quickly adapt to new technologies and languages, and designs new software using the best tools for the job rather than choosing from a limited set of "comfortable" options. This is a key reason he is able to deliver highly efficient software products.

I have known Scott for over 20 years and have worked with him on many projects. He thinks quickly, communicates clearly and executes in record time. If you are considering a new software project or need a technology advisor, I highly recommend Scott Mitting.

Sincerely,

A handwritten signature in black ink, appearing to read "Damian J Trabel". The signature is fluid and cursive, with a prominent flourish at the end.
